

Tech Tip Tuesday—January 21, 2014

by David Hirsch

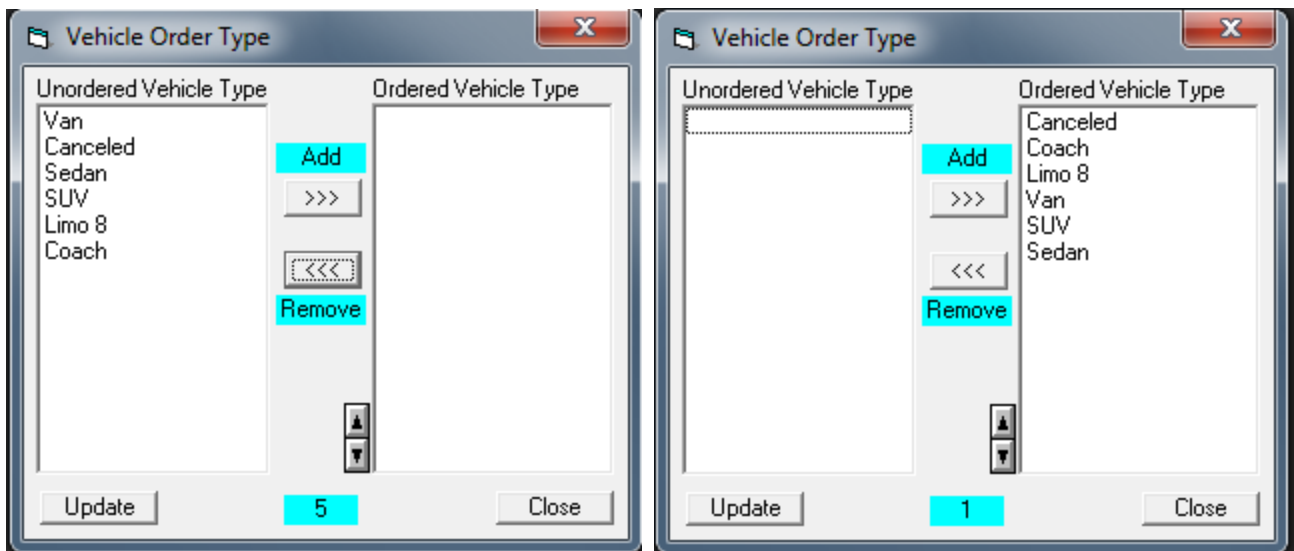

Order of Vehicle Types and Vehicles

In Livery Coach it is possible to “sort” your vehicle types however you choose, and also to sort your individual vehicles (so it is not dependent on what you actually name your vehicle types or vehicles).

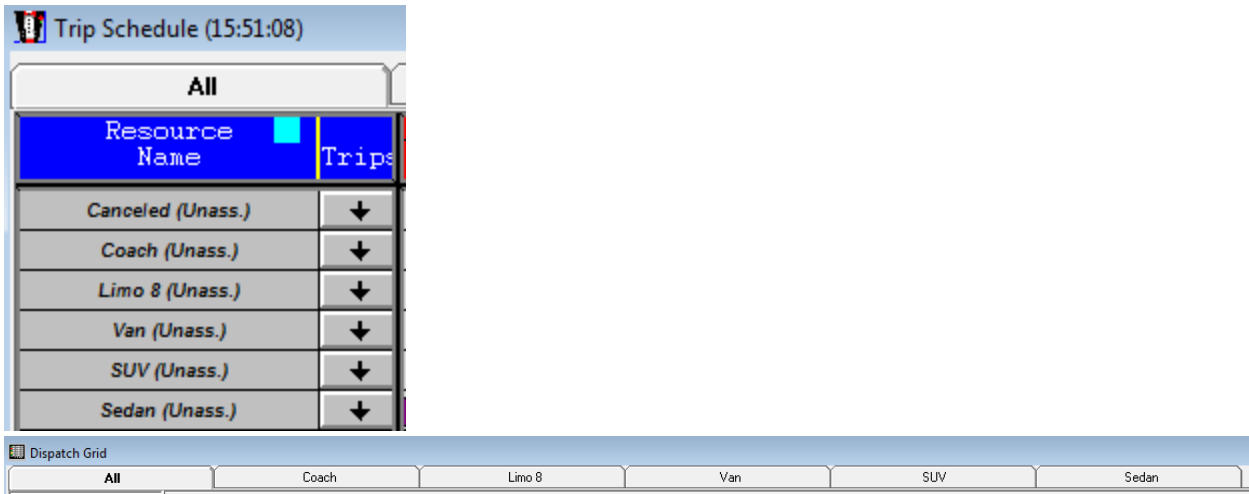

To sort your vehicle types, open Maintenance and go to Vehicles...Types...Order List.

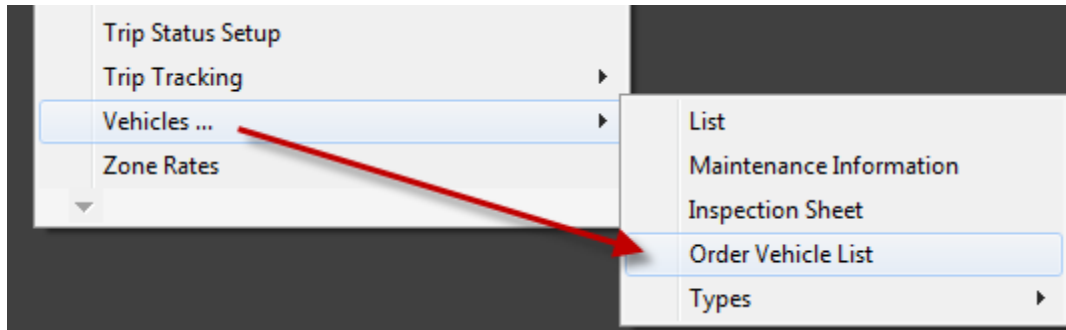

You will see all the unordered vehicle types on the left...simply move them to the right in the order that you want—if you want to move a type up or down, select the type and use the UP/DOWN arrows. (Note that if you are using the Trip Schedule screen we recommend you have a Canceled type, and make it top on the list).

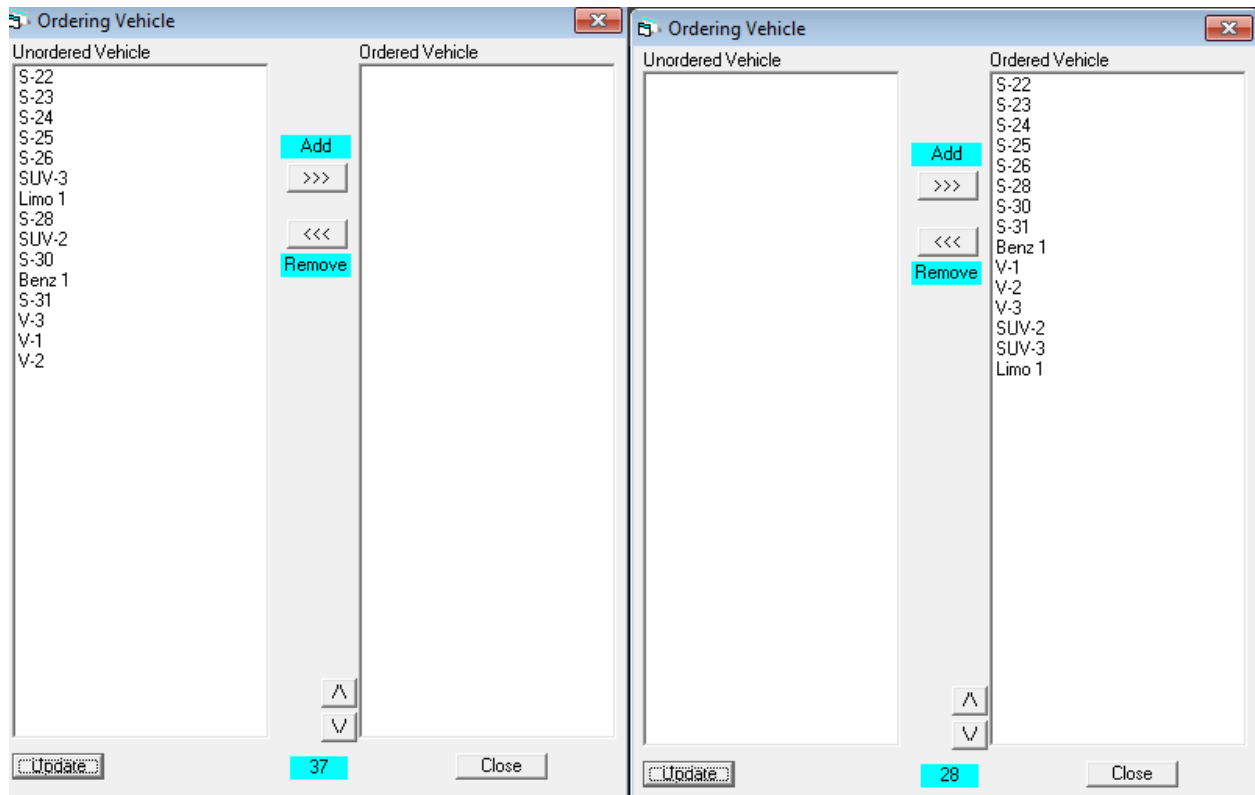

Once they are in the desired order, once a user logs out and back in the new order will be seen on both the Trip Schedule screen and the Dispatch Grid.

Once your vehicle types are in order, you can move on to your actual vehicle order:

The process is similar

When you are complete, you will see the vehicles in the order you selected.
