

## Tech Tip Tuesday— September 8, 2015

by David Hirsch

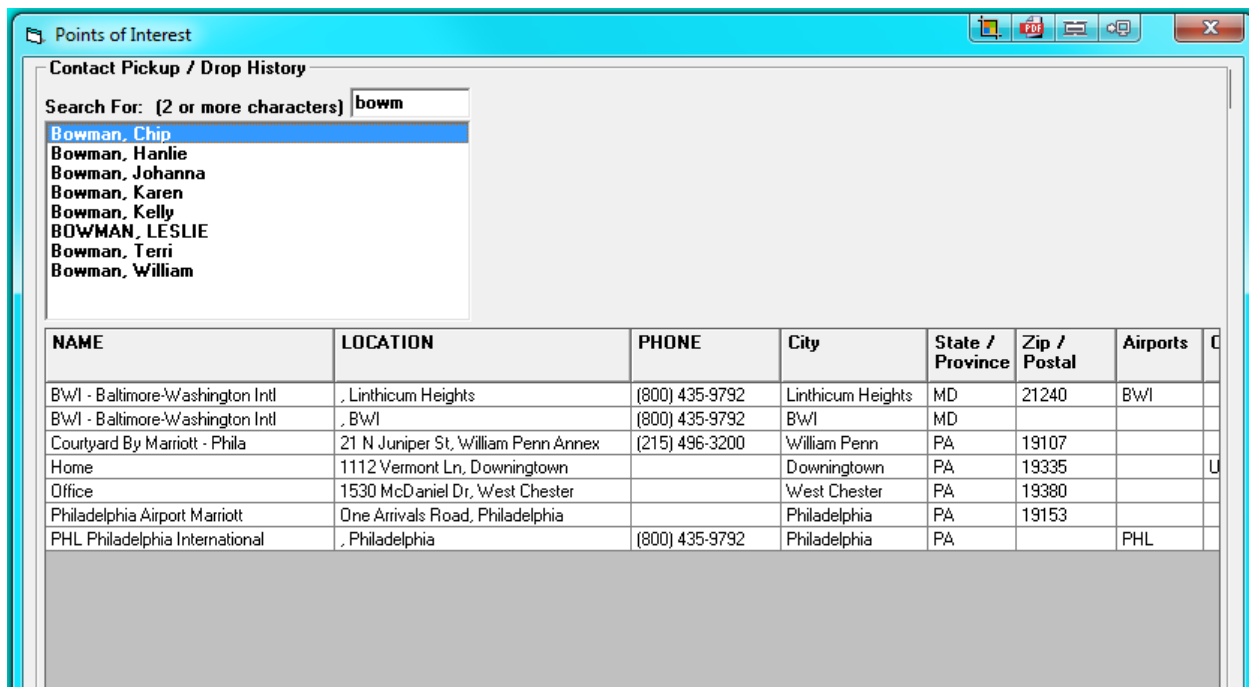

### One more tip in the Pickup/Dropoff screen

Last week we talked about the two most popular ways to find a common location (Point of Interest)...by Category, and Alphabetic.

There is one more way, although not commonly used. Notice the third button (under Category) labeled “Contact”.

When you click on the Contact tab, a box opens up where you can search for another contact—and then select a location from that person’s list of historical pickups and drops. This is useful when you are making a booking for someone who is going, for example, to another one of your customer’s home or office, or some other place that you know is in a different contact’s history.
