

## **Tech Tip Tuesday— November 24, 2015**

### **URGENT NOTICE:**

Microsoft has come out with an optional Windows Update that will break the ability to save reports as pdf, and also break emailing of reports. Please do not install this update (which supports Azerbaijani Manat and Georgian Lari currency symbols in Windows). If you have already installed this update, uninstalling this update from your machine will fix the problem.

For more information on the update, please see <https://support.microsoft.com/en-us/kb/3102429>
