FlightView Feed Upgraded

For those of you with the FlightView flight tracking option, we have been working with FlightView to upgrade your data feeds so that we can now present Gate information and even Bag Belt.

This data will show up in the Flight Status column of the Dispatch Grid. As you can see in the below screen extract, one of the flights is already at the Gate (E13) in Terminal E, and the bags are on belt G.

Another flight is Landed and heading to Gate D5 but isn't there yet (and no Bag info is available).

So if you haven't been looking at the Flight Status column on your dispatch grid, or if you have it narrow so you can't read the words, you might want to take another look.

Orig Dep Time	Flight Status	Flight Type
	TermE AtGateE13 BagG	Arrival
		Departure
	Landed TermD GateD5	Arrival
	In Air	Arrival
