

## Tech Tip Tuesday—March 12, 2019

***Please note that below the announcements, there is a genuine Tech Tip buried in here. Don't miss it!***

### **UPDATED LOCATION: LCT Las Vegas—Livery Coach User meeting (please RSVP)**

A reminder that our LCT User's meeting is coming up soon. If you have already told us you are attending, thank you very much! If you are planning on attending but we don't know about it, please RSVP to [news@liverycoach.com](mailto:news@liverycoach.com) before you forget!

The meeting will be held on **Sunday, March 24, 2019 from 2:00pm to 4:00 pm) at the Mandalay Bay North Convention Center, Tradewinds D**. Note that this is a different location than what was originally announced.

### **LAST CALL - Google Maps Update**

As some of you have already seen, we are updating everyone this week with our new MapBox integration. If you are using Mobile (the iChauffeur app, iLivery, etc.) with the optional mapping licensing (the \$4/month/iChauffeur charge), you need this update to avoid any interruption in mapping services.

As a reminder, there are other mapping functions in Livery Coach that are not related to tracking your chauffeur location. For example, if you have the mapping integration module, you can verify an address in a trip, or calculate routing. You can map the locations of your Affiliates. You can enable Google places to help find Points of Interest when creating a reservation. For those of you using the web module, the Zero Resistance Web Booking system displays a map for your customers when they book.

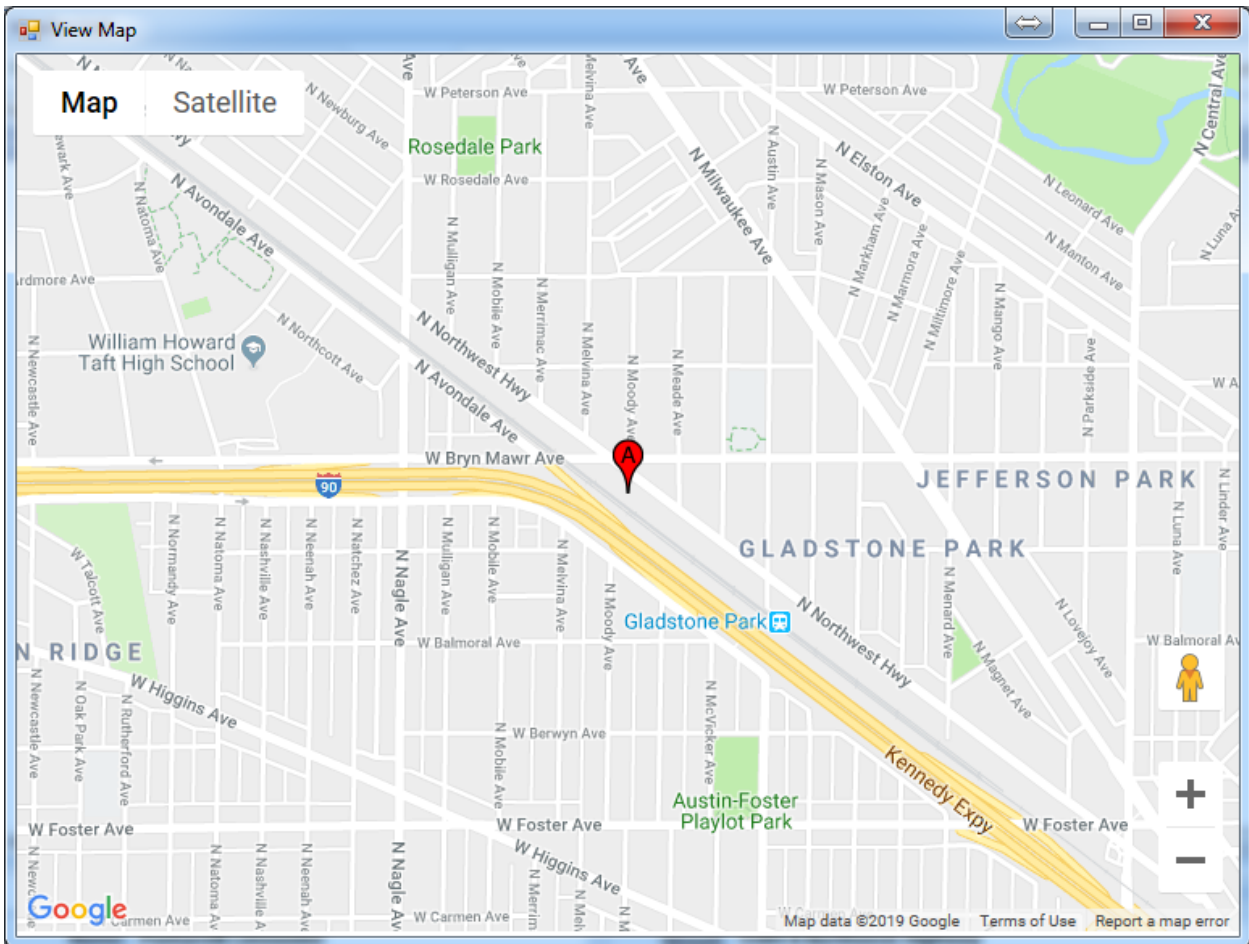

As mentioned in previous tech tips, all of these functions require a Google Map key, which you need to set up. If you rely on these functions and have not given us a key, please act fast to avoid any interruption of service, which will happen this week without a key. While we will do our best to provide prompt tech support, if you wait too long there may be a delay before your services can be restored (and you will need a key). For more information on how to obtain a Google Maps key, please refer to the January 29 Tech Tip.

### **Affiliate Location**

If you take a look at your Farm agreements, you will see at the bottom a place to enter the exact address of your affiliate's garage—and the system will determine the latitude and longitude (using Google) for that address. You can even click on the little map button to see it.

General	Hourly Rate	Zone Rate	Add Charges
<b>Name:</b> Pontarem <b>ID/CustCode:</b> pon0404 <b>Phone:</b> (800) 322-5466 <b>Grade:</b> 1 <b>Time Zone:</b> (GMT -06:00) Central Standard Time <input type="checkbox"/> Not Daylight Saving		<b>Street:</b> 5584 N Northwest Highway <b>City:</b> Chicago <b>State/Province:</b> IL <b>Zip:</b> 60630 <b>Country:</b> United States (USA) <b>Lat:</b> 41.98222 <b>Long:</b> -87.781752 <input type="button" value="Get Lat Long"/>	

If you have good addresses for all your affiliates, then, when you are in a trip and are going to select an affiliate to farm a trip out, you can click on the map button and see where the affiliates are in relation to your trip. In the below screen shot, you will see the S for the start of the trip, the E for the end of the trip, and the affiliates you have in the area (along with their rating):

Farm In\Out Selection

Payment Collection

- In House
- Farm In
- Farm Out

- We Collect
- They Collect

Airport Code Search

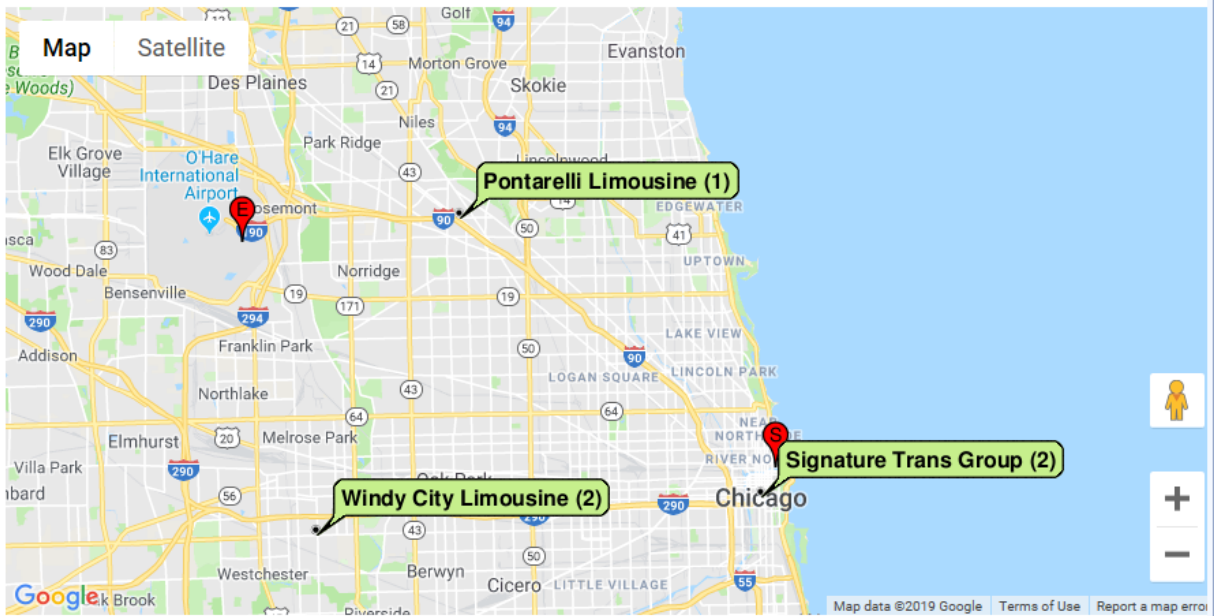

- Airport Code
- State/Provin
- City
- Area
- Company
- Vehicle Type
- Country
