Livery Coach has integrated with GroundXchange

GroundXchange™ (GXE) is GroundWidget’s technology for sending and receiving trips to and from affiliates. As part of the benefits of Livery Coach joining the GroundWidget family, we have just about completed a full integration with the GroundXchange system.

What that means is that Livery Coach users will soon be able to send and receive trips directly to/from SantaCruz users, with no third party middleman needed.

The integration is bi-directional and includes driver confirmations, dispatch status updates, GPS tracking data, and ride closeout data to the Farm-In affiliate. All at a cost of only \$1.25 per ride (send or receive) and no monthly fixed charges.

In order to get set up, it’s a process with a few steps, some of which need to be done behind the scenes, so it needs to be scheduled. To get on the schedule, please send a note to support@liverycoach.com so that we can prepare your system.

The basic process is that we first make sure you are on the latest version of Livery Coach. Then you will also need to sign a contract addendum that we will prepare and send to you that will need to be returned.

Once that’s done, we will coordinate with GroundWidgets to make sure you have a GXE ID, do some system setup behind the scenes, and then contact you with further instructions.

When the initial setup is complete, you will be able to set up your affiliates yourself right in the Farm Agreement, simply by selecting “GroundXchange” in your Farm Agreement, and entering the GXE code for your affiliate in the Network Code field.
